## New York

NEW YORK, June 28 .- Trading in stocks today lacked the breadth and uniformity of the previous session. The warning of Britain's premier as to the imminence of another German drive reemed to offset the further achievements of Italy's troops and accounted for the pregular tone at the Sample farm.

Foremost banking interests evidently attached little significance to the utterances attributed to Germany's foreign Muister, in which responsi-bility for the world conflict was placed chiefly spon Russia, with intima-tions of a retention of Teutonic control over Belgium.

Domestic developments exerted no marked influence, the several regutar dividend declarations being in with general forecasts. Rock isline with general forecasts. Rock is They Spend Spare Time Bemake definite dividend announcement at tomorrow's meeting.

# Why don't you set your advertising money at work?

No, it isn't-not if it is merely being spent.

Not if you find yourself every little while wondering if advertising really does pay.

Not if you are conscious of a little uneasiness every time you see your competitor's advertisement boldly facing you down.

Not if you find it necessary to dissect every piece of copy "in conference" and work in a trifle by Smith here, and a stitch by Jones there, and a patch by Robinson here and there, and finally cut out whatever of human individuality the poor bowelless thing had when it came

If it had half the giddap in it that your slowest salesman has you would say every time you saw your copy in print, "That has a wallop in it! That will do business!"

Why have you been so willing to spend your money for copy thet doesn't make you say that?

Is it because you think it's too much to expect?

Because you think it can be done for some other line of business, but not for yours?

Because you don't believe in your own product?

Or is it because you never got acquainted with Hanff-
